

REMARKS

Applicants present this application for renewed consideration by the Examiner. Claims 1, 10 and 21-38 remain pending. Minor editorial amendments to claims 1, 21, 24 and 36 have been made to correct minor oversights. There is no new matter.

Turning to the Restriction Requirement as between, Group I comprised of claims 1 and 10 versus Group II comprising claims 21-38, Applicants elect the Group II claims. Applicants' election is with traverse. All claims can and should be examined at one time and the examination and prior art of record in the parent application is noted in this respect. Nonetheless, Group II claims are believed to be in condition for allowance and Notice of the same is earnestly solicited.

The Requirement for Restriction apparently also includes a Species Requirement, but it is not entirely clear. Nonetheless, as a provisional species election, these refer to original claims 29 which indicates that the invention of claim 21 may include a removable plug releasable retained within the chamber. Assuming that this is a provisional species election, at least claims 21 through 38 are broad enough to read on the elected species, although claims 21, 29, 30, 31, 32, 33 and 34 are noted with particularity.

If the Examiner has any questions or concerns, please contact Applicants' legal representative.

Respectfully submitted,

Fitch, Even, Tabin & Flannery
